

1.Introduction

Project Title:cook book

Team ID:

Team Leader:**A.Mohamad Irfan**/iirfan18412@gmail.com

1.S.bharathkumar/kingofbarath8@gmail.com

2.G.jinoth/jinothgovindhan49@gmail.com

3.M.santhosh/kmurugaiyan036@gmail.com

2.project overview

Purpose:cook book is collection of "recipes,"which are structured solution to simple,specific problems.these recipes include a short problem description,a solution,and often acide sample.

3.Core features

1.title page& introduction

- Book Title,author,and purpose
- Introductory note on cooking style,cuisine or inspiration

2.table of contents

- Organized list of chapters/sections(e.g., Appetizers,main dishes, desserts).

3.recipe index/quick reference

- Alphabetical or ingredient-based index for easy searching

Recipe Page features

Each recipe typically includes:

1.recipe title(e.g.,spicy paneer tikka)

2.serving size & yield(e.g.,serves 4)

3.preparation & cooking time

4.ingredients list-clearly measured and ordered

5.cooking tips/variations-substitutions,healthier options,chef's advice.

6.photo/illustration -finished dish or step-by step visuals

4. Design & Navigation Architecture

Consistent Typography → Headers for recipe names, bold for ingredients, numbered steps.

Visual Hierarchy → Recipe titles big & bold, ingredients in list format, steps clearly separated.

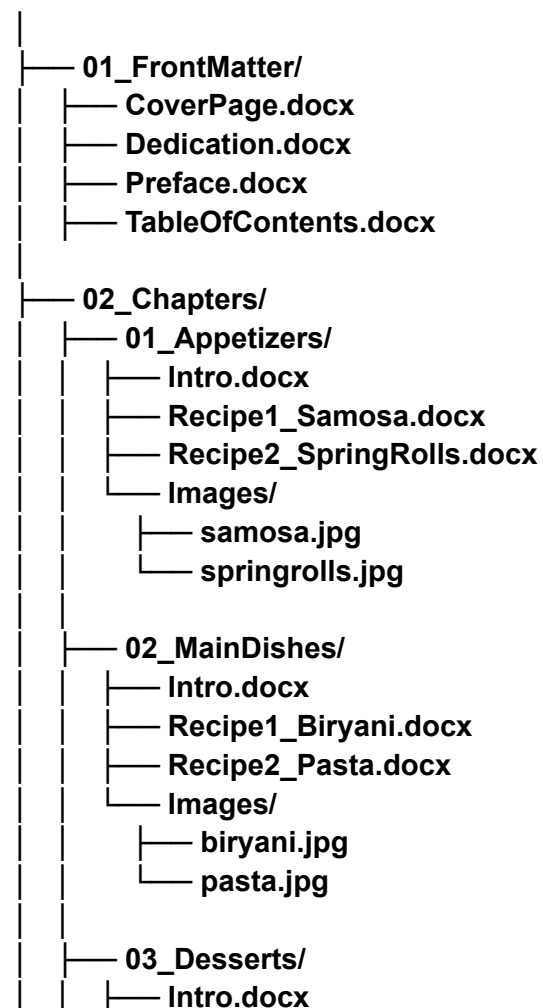

Color/Theme → Consistent style across sections (e.g., warm tones for Indian cooking).

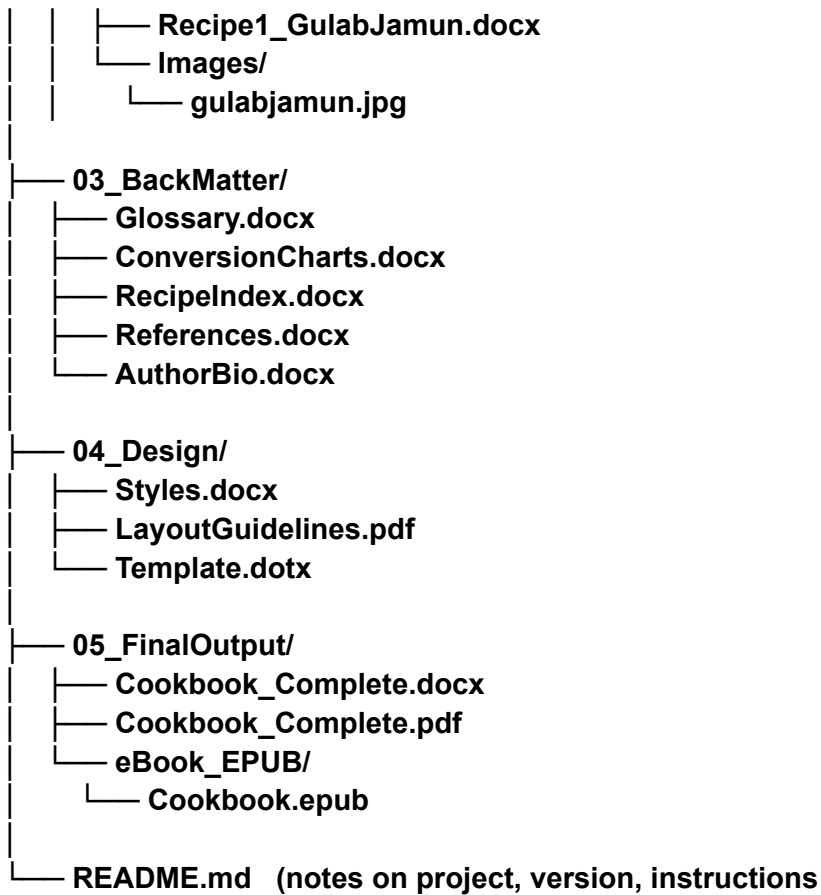

Images & Layout → High-quality dish photos, step illustrations, decorative dividers.

Interactive Elements (if digital) → Hyperlinked TOC, recipe filters (vegetarian, quick meals).

5. Folder structure

Cookbook/

6.Run the application

7.Best practice

Use local state for UI-specific needs.

Use context or lightweight stores(zustand/recoil) for small apps.

Use Redux Toolkit for large-scale apps.

Manage server state separately(React Query,SWR),

8.Testing

Share draft recipes with a small group of readers/cooks

Collect feedback on ease of understanding, clarity, taste results.

Adjust recipes or instructions based on real-world trials.

10.know issue

You'd put in a testing/review document for cookbook project,so editors/testers can catch them before final release.

Would you like me to prepare a "Known Issues Log Template"

11.conclusion

A conclusion in cookbook document is like the closing chapter of a story --it wraps up the journey leaves readers inspired,and guides them on how to continue using the book.
